Frontend developer

I am a passionate **frontend developer**, transitioning from a strong background in QA automation over four years. Proficient in **Angular**, **TypeScript**, **HTML** and **CSS**. I focus on building functional, efficient, and user-centered interfaces. With a background in QA automation, I bring a unique perspective that combines **attention to detail** with a deep understanding of user behavior. **A quick learner** who adapts rapidly to new technologies, I thrive in collaborative environments and am eager to contribute to impactful frontend projects.

WORK EXPERIENCE

Frontend developer

08/2024 - Present

BKN301

- Developed new components integrated with backend services, focusing on UX improvements, mobile responsiveness
- Redesigned the dashboard with dynamic views tailored to user types and scopes, enhancing usability and efficiency.
- Fixed various issues, including UI inconveniences, logic errors, and functionality bugs, to ensure a seamless user experience.
- Maintained and developed key frontend features, including state management, pipelines, loading states, error handling, filtering, and data pagination, using Angular 13 and 15, TypeScript, HTML, and SCSS.

QA Automation Engineer

10/2023 - Present

BKN301

- Established automation testing and testing practices from scratch, implementing robust UI and API testing frameworks using TypeScript, Playwright, and Jenkins.
- Automated the testing process for account statements, reducing testing time from several days to just 10 minutes, significantly improving efficiency.
- Managed and mentored a QA team of two members, providing guidance, conducting code reviews, and fostering a collaborative team environment.
- Collaborated closely with cross-functional teams, including developers, DevOps, and project managers, to ensure seamless integration and high-quality deliverables.

Middle Software Test Automation Engineer

01/2022 - 05/2023

EPAM Systems • Kyiv, Kyiv City, Ukraine

- Healthcare project
Automate manual test cases(UI and API), maintain old automated tests, perform regression testing manually (UI and API), configure test environments (Linux commands), write test artifacts

Junior Software Test Automation Engineer

10/2020 - 01/2022

EPAM Systems • Kyiv, Kyiv City, Ukraine

- Fintech project
Create and execute automation tests, maintain written tests, release support, regression testing, testing new features, communicate with developers/devops, write test artifacts

SKILLS

FE Technologies

- JavaScript
- TypeScript
- Angular 13,15,17
- Redux
- HTML
- SCSS
- Bootstrap
- Responsive Design

Languages

- English - B2
- Polish - B1
- Ukrainian - native

Testing

- Playwright
- Selenium
- API Testing
- UI Testing
- Test Automation Framework Development

Others

- Git
- GitHub
- Bitbucket
- Jenkins

EDUCATION

Bachelor's degree in Computer Science

National Technical University of Ukraine 'Kyiv Polytechnic Institute'

01/2018 - 12/2022
